SUMMARY

My passion is to turn data into insights and products. Many problems can be solved by asking the right questions and using data to answer them, but many data sources are still untapped. I like working out the questions with the experts and digging down the data to find those gems. Overall, I've more than 6 years of experience in applying statistical and Machine Learning techniques to build prediction models for diverse business and research projects. I've led a team of 3/4 people in several ML projects where we used different Big Data technologies.

ACHIEVEMENTS

Built a Machine Learning AML solution in 3 weeks providing savings for up to 2.6M CHF a year.
Leading several analytic projects with a team of 3/4 people after 1 year.
Provided training on Machine Learning to EY consultants across Europe (> 100 participants).
Promoted to Senior Consultant at EY after 1 year.
Obtained a PhD, published several research papers and visited research labs in USA and Europe.
Completed Master studies while working full time at Directa Sim.
